

Requirement Analysis – Data Flow Diagram with Flowchart

Project: Food Survey Analysis using Tableau

This PDF complements your uploaded Data Flow Diagram by adding a flowchart and detailed explanation. It is based on the same project description. See uploaded document for the original DFD content. [filecite turn4file0](#)

Data Collection

Food survey data is collected from CSV or Excel files uploaded by the user.

Validation

The system checks for missing values, duplicate records, invalid formats, and inconsistent entries.

Cleaning

The dataset is standardized and corrected to improve analysis quality.

Storage

The processed dataset is stored for dashboard generation.

Analysis

Tableau performs calculations, trend analysis, and KPI generation.

Visualization

Interactive charts, graphs, and filters are created for users.

Report Generation

Dashboards can be exported as PDF or images for documentation.

Conclusion

The flowchart clearly represents the movement of data through the Food Survey Analysis system.
